

New! Belt Improves Spinal Mechanics, Lower Back Pain Diminishes

Attack lower back pain with this revolutionary back belt that improves spinal mechanics to correct bad posture. The Back-A-Line's patented "curved and firm" rigid pad fully conforms to the lumbar spine, providing steady, precise support. The non-stretch, washable and breathable fabric belt adjusts with Velcro for a snug, custom fit that resists shifting or slipping so the lumbar pad stays put. The belt's rigidity creates isometric resistance for abdominals to push against, which helps make them stronger. Wear during any activity to reduce or relieve back pain or protect against it. 100% Polyester shell, 100% Nylon liner. *Black. Specify by waist size: SM (27"-32"), MD (31"-36"), LG (35" – 40"), XL (39" – 44") or XXL (43" – 48").*
